## DIRECTORS' REPORT

---

The directors submit their report and financial statements of J M Computing Limited for the year ended 30 June 2009.

### **Business Review and Principal Activities**

The principal activity of the company during the year was the provision of IT support services, infrastructure and business management software.

There has not been any significant change in the company's principal activity in the year under review. The directors are not aware, at the date of this report, of any likely major changes in the company's activities in the next year.

As anticipated, the challenging conditions in the UK economy had an adverse impact on turnover and profitability of the company during the year. A freeze in the capital investment by clients led to a significant reduction in our project related turnover. Our reaction was to reduce our overheads in our sales and delivery teams to the appropriate level. However our support contract revenue has remained strong, with clients valuing this service even more in difficult times and regarding it as an essential business support service. As a consequence our investment in our support function has remained constant and our client survey statistics indicate record levels of satisfaction.

We have also experienced excellent levels of client attraction, with significantly more new clients gained than in the previous, record turnover, financial year. Poor quality service and concerns over financial stability of their support partner are the major reasons quoted for driving them to market.

As shown in the company's profit and loss account on page 6, sales have decreased by 18.8% over the prior year and profit before tax has declined by 35.2% from 12.9% to 10.3%. The balance sheet on page 7 shows the company's financial position at the year end. The directors consider the level of sales, gross profit and profit before tax to be the key performance measures for the company on a monthly, quarterly and annual basis. There are no further KPIs that are necessary for an understanding of the development, performance or position of the business of the company.

Other financial risks faced by the company include credit risk and liquidity risk. The company manages these risks by performing client credit checks and cash flow forecasting and monitoring.

The last two quarters of the financial year saw a stabilising of our sales performance at forecasted levels. The forecast for the coming year is based on a continuation at these levels and consequently a return to the degree of profitability traditionally experienced. The combination of our sales pipeline, order book, client survey statistics and client attraction and retention rates suggests that this will be achievable.

### **Dividends and Transfer to Reserves**

No dividends have been paid during the year (2008 - £1,879,482). No final dividend is proposed (2008 - £nil). The profit of £640,830 (2008 - £969,636) has been transferred to reserves.

### **The Directors of the Company**
